---

Jeffrey,

Attached please find a "Rope" inspired furniture concept, the rope would be a *natural* color...mixed with cerused oak furntiure, large scale slipcovered seating and a modern armoire. The armoire and nightstands can be designed to spec, with any lighting and interior fit out.

Also included are thoughts on the vanity and mirror that could follow the "Rope" idea.

To this, I thought perhaps the light blue palette would be a nice compliment...two photographs are attached:

1. Soft Blue on site
2. Further developed...the colors are showing a bit darker/gray green, on my screen than they are in reality...the idea is a lot of cream and white with small accents of the blue

Take a look and let me know your thoughts,  
Amy
