---

Hi Tyler,

Seth Lloyd likes the quantum article-- see below. so I'll incorporate his edits and ask him to put his name on the piece as editor-- the ideal place is to place this on Jeffrey's guest editor page at Scientific American online (or Nature online which Sc Am hosts). That way Jeffrey can get his name in their url as well has hyper links in the text.

AI/ Ethiopia piece on its way over to you,

Dear [REDACTED],

Looks good! I added a few minor changes to make sure credit was given where due. Plus it is qubit, not qbit!

Seth

Dear Seth,

I hope you are well. Just checking to see if you received the quantum--photosynthesis article draft? It's reattached below.

One thought in order to secure it a place with Scientific American, Nature, Forbes or other entity is to have your name on it as editor or a 'prefaced by'. As mentioned, Jeffrey will have a guest editor page with them and would point to the article.

Thank you for your thoughts.

Best regards,

**Subject:** From Jeffrey's VI Foundation: article draft attached

Dear Seth,

I hope this finds you well. Attached is a draft for a feature article based on your research papers in green sulfur bacteria quantum transport. The working title is: **Sulfur Bacteria Photosynthesis Offers Luminous Clues for Quantum Computing.**

Jeffrey has been invited to be a guest editor at *Scientific American*--so we are hoping to get it published there, or with *Nature* or *Forbes*. Please let me know if you have any other suggestions for publication in the event that *Scientific American* or *Nature* can't take it. We could possibly reach out to David Gergen at CNN.

Also, please feel free to scribble over/edit and adjust the article. I am a mere layman in this most delicate topic. I look forward to any comments.

Lastly, we are hoping to incorporate Jeffrey's name into the article as much as possible. So any suggestions would be immensely helpful.

My very best regards to you and thank you!
