Wolfram Insider for Education

Issue 4, 2015

NOW AVAILABLE
Wolfram Language Update »

Get access to hundreds of new and expanded Wolfram Language functions when you upgrade to the newest releases of *Mathematica* 10.1, Wolfram Desktop, *CDF Player Pro*, and web*Mathematica* 3.3. For details and to upgrade, contact us at sales@wolfram.com.

NOW AVAILABLE
Reliability Analysis New in Wolfram *SystemModeler* 4.1 »

Mathematica's complete suite for reliability analysis, with functionality for reliability block diagrams, fault trees, and importance measures, can now be used with *SystemModeler*. Additional updates include FMI-standardized model import and model development.

SPECIAL OFFER
Add Up the Savings during Math Awareness Month »

We're celebrating this April with special offers on *Mathematica Home* and *Student Editions*. Save up to 25% on *Mathematica* 10.1 through April 30.

FROM THE EXPERTS
Virtual Workshop: Unboxing the Wolfram Cloud »

Learn about computation, data storage, and deployment in the Wolfram Cloud during this free online workshop on April 28. New and upcoming products and services will be discussed including Wolfram Programming Cloud,

Mathematica Online, and the Wolfram Data Drop, and we'll cover how they can be accessed in public and private environments. Space is limited, so register today.

STUDENT OPPORTUNITIES

Wolfram Student Ambassador Program »

Wolfram has great opportunities for students who want to get their skills noticed. Take part in the new Wolfram Student Ambassador Program to be an advocate on campus, or test your skills with the *Mathematica* Student Certification Program.

IN THE SPOTLIGHT

Explore the Frontiers of Computational Thinking »

Find out what all the buzz was about at SXSW. Stephen Wolfram recaps his SXSW talk covering topics like software development approaches, computation in education, and the future of the human condition.
