 [This Week on Kickstarter](#)

JULY 05, 2012

We've seen the future and it's looking mighty bright. With a bit of ingenuity and whole lot of ambition, projects this week explore the depths of the ocean, soar beyond the atmosphere, and take a plunge into the bold new world of self-publishing.

 [OpenROV - The Open Source Underwater Robot](#)

[OpenROV - The Open Source Underwater Robot](#)

by OpenROV

 Category Open Hardware

 Location San Francisco, CA

Under the sea

OpenROV is a low-cost, open source robot designed to make underwater exploration possible for everyone. About the size of a shoebox, the compact robot can house a camera and explore almost any watery space, from your bathtub to the ocean. Whether you're a maker, hobbyist, or scientist, the OpenROV is sure to unlock your inner Jules Verne.

Tomorrow Magazine

by Tomorrow Magazine

Category Journalism

Location Los Angeles, CA

New new media

What happens in the year 2012 when a newly-unemployed editorial team bands together for one last project? *Tomorrow Magazine*, that's what! *Tomorrow* will be the magazine these writers and designers always dreamed of making, featuring stories about opportunity, breaking from the status quo, and what comes next. Sounds appropriate!

Final Frontier Design's 3G Space Suit

by Ted Southern

Category Technology

Location Brooklyn, NY

One small step

With the fledgling commercial space industry making major strides, a fundamental problem for space travel remains in need of a better solution: the space suit. Artist Ted Southern has teamed up with veteran space suit engineer Nikolay Moiseev to develop an inexpensive, lightweight suit capable of providing astronauts with unprecedented mobility. Bulky space suits of yore are about to take a giant leap forward.
