Jeffrey,

Since we talked about Martin....I wanted to share a piece he just sent us. He contributes something to Nautilus at least once a year....and thought you would enjoy it. Though he is often referred to as Dr. Doom....he really is one of the kindest people you can meet.

John

Dear John

I hope all's well with you. I realise I never responded to your invitation last year to write for one of your issues.

I have been beavering away with papers, talks and lectures. Nothing that obviously fits your agenda, but I thought I'd send the script of the inaugural 'Carl Sagan Lecture' which I gave at Cornell in May this year in case any bits of it could be turned into something relevant to you.

Best wishes

Martin
