---

Jeffery,

I mentioned to you a few years ago that I would be starting my own animation studio, and that I would bring it to you first. The timing is right for me now, with two television series airing, and two films starting production in 2015.

As you can see from the presentation, CG animation is the true growth industry we have in the motion picture business.

I was hoping also that we could set a call, or sit down to discuss this presentation.

I hope all is great in your world!

Best,  
Barry J

P.S. I will get [REDACTED] scheduled!!
