Hi Rich, Go to Ruckussecurity.com they are a Bigdog dealer like myself. Firmware prices is dependent on what you need the radio to do.

You can always find products online for a cheaper price, but warranty, support and upgrades become a issue because you didn't buy it from a authorized dealer. I'm not going to go back and forth on this Rich. If you want to purchase one and have me just install and configure it. I will do that, but I won't support it and if it gives problems and I have to go out. That won't be included in my service fee.

Regards,
Terrence Rabsatt

Yes we are using Ruckus, and that is the basic unit correct. Once again you have to add the premium support and upgrade the firmware. If you have any other questions feel free to contact me.

Good morning,

I sent out a email this morning but looks like it didn't go and it's not saved, anyway.

LSJ gym link went down again this morning around 5:00am, I did manage to get it back up quickly. I will continue to monitor closely since it is very unstable right now.

After yesterday I think it's best we purchase some SMX3000RMLV2U +(1)SMX120RMBP2U. it's a combo ups that can give us 6-8 hours of backup power. I also looked into the solar panel backup unit JE asked about and Im going to prepare a quote for both today and present them for your review and approval.
