Working Memory and Learning Disabilities: A Review

Working Memory provides a mental work place to support everyday cognitive activities that require both processing and storage. It has been found to be associated with a range of cognitive functions. Recently, a strong link between working memory and learning has been reported. This finding can be implicated in learning disabilities. It is likely that limited working memory functioning of children with learning disabilities hampers their learning skills; possibly because of the crucial role played by working memory in learning process. The current paper reviews working memory functioning in...

PURE VISION AND THE VISION OF THE GURU: A PHENOMENOLOGY OF BEWILDERMENT

It is not easy to understand the nature of the guru and understanding the nature of the guru can be bewildering. There is often bewilderment about the guru. One source of the bewilderment is that people think that the guru is an individual person and for most people the understanding that the guru is not a person has been foreclosed. The guru is not a person. And when people see and believe the guru is a person, such a belief will create illusions about the person whom they think is the guru, and their own relationship with the person whom they see as the guru will fall into various forms...

Stuart Hall's "Deconstructing the Popular": Reconsiderations 30 Years Later

This introductory essay outlines some of the issues that surround contemporary engagements with the "popular" as a site of political struggle and change. This piece notes that in the 30 years since Stuart Hall published his seminal essay, "Notes on Deconstructing the Popular," the power relations that define the term as well as the way in which scholars study the popular have shifted in profound ways. The authors argue that, rather than simply equating the popular with popular culture, it is necessary to recognize that the popular is a contingent term that marks the possibility of...

Character Assassination in Theory and Practice 2017 Conference Report

The 2017 Conference on Character Assassination in Theory and Practice took place at George Mason University's Arlington Campus from March 3-5, 2017 and welcomed U.S. and international researchers from nearly 30 colleges and universities, studying different aspects of character assassination. The three-day CARP 2017 conference featured critical input from practitioners in crisis management, journalism, and public relations. Keynote speaker Eric Dezenhall offered a practitioner's view of modern crisis management within a new media environment. A panel discussion on character assassination in...
