Hi Larry,

Please see attached repair quotation from FJ Turbine Power for the 219 Valsan Engines. I sat with Manny Castanedo

to review the past records/ SV Reports, etc. I have managed engines into FJ Turbine Power for almost 15 years without any

problems. They stand behind their work 100% and produce the best performing 219 engines.

From the past SV ( Timco) it appears that the HPC Disks 7 thru 12 all scrapped due to corrosion from the current Disk Sheet.

FJ Turbine has a number of Disks with 2000- 4000 cycles remaining that should significantly lower the cost below the NTE indicated.

If you have any questions, please let me know.

Kind Regards,

Michael Maier
