---

Jeffrey,

I have many questions regarding 430 interior:

I'm meeting with interior shop manager now to discuss seat design,.

-i understand the fwd facing seat divan will copy the Bently interior photo, I will send photo to confirm,.

-we need direction as to design of aft facing seat? The seat cushions are only 16" in width, and appear small if

we make them as three individual seat cushions as they currently exist, . One idea is to bench seat the design

similar to GII seat at table location, see photo, with brown piping,.

My question would be individual seat? Or GII design bench?

I will also send photos of leather you selected for seats, the color is different then existing headliner, it works, but want you to approve,.

More photos to follow shortly.

Thx

Larry
