THE VIGIL FOR INTERNATIONAL PEACE AND ECOLOGY is a grassroots transformational effort dedicated to promulgate peace through participation in art, song, dance, music, prayer, and ecological awareness. The purpose of the VIGIL is to awaken humanity to harmony and peace through the power of intent and celebration. Our vision is to heal and bridge our lives and communities in order to achieve divinity alignment and recognize the oneness in all. In its 10th year, the VIGIL was inspired by the United Nations' 2001 Resolution 55/282 designating September 21st of each year as an "International Day of Peace", and to have the entire world observe a full day of "global ceasefire and nonviolence.
