---

Jeffrey,

I attached the aft lavatory drawing showing the mod for the valance. It also shows the switch / return to seat panel below the sink.

I will discuss the option of moving it into the side of the forward bulkhead (closet) as we discussed.

Please also look at the attached photos showing 2 ideas for the galley outboard wall we will fabricate.

The first is a cleaner line the second gets you further outboard but is a little wavy. I like both but prefer the 1<sup>st</sup> one.

Let me know your thoughts so I can keep the momentum going on your project.

Thank you

**JAY MASSAR** | OPERATIONS MGR
