Jeffrey,

I will meet with Brian Wilson from Banyan Avionics based in Fort Lauderdale tomorrow morning at 9am to discuss Airshow price and install logistic in the Boeing. Brian completed the FMS upgrade to our Boeing and is very familiar with our plane. I have also requested a quote from Eric Roth to compare pricing, should have Eric's price around 6pm tonight,.

For Starters, Brian gave me a rough cost estimate, since he just completed an airshow installation on a private Boeing 747 based in Qatar in February.

Airshow 4000 base price is $45,000.00

World wide data base and software to point in direction of Mecca, $20,000.00

www.Flightdisplay.com LED FAA approved monitors have large selection of sizes and prices, safe estimate is $10,000 per monitor, need four for installation per Qatar: $40,000.00 (could be less due to size selected,.

DER engineering for monitor mounting in B727, $4,000.00 per application total: $16,000.00

installation and travel to Jacksonville for installation: $30,000.00

low estimate total price $151,000.00 Will have firm price Banyan and Eric Roth by Wednesday,.

reminder:

B727 C2C flat rate labor only is $273,000.00   Morrison estimates $150,000 for items found during inspection, this is only a Morrison Guess, total budget for C2C from Larry M estimated at $420,000 (3 week down time)

the fwd and rear lavatory's will be removed and galley for below floor corrosion inspection,.

thx,
Larry
