---

My guy said / dealership is saying the suspension has not really changed. Cars start coming in late August. I want to ask this kid who does armor for these cars what he does to the suspension - he is the one who actually told me suspension would be changed as he has same issues with his clients  
I saw the car at trade show. Feels better for back seat / doors wider Seat still tight by 3 inches I'll also ask that kid about the movement of seats
