Rich
JEE requested I do research on an Awning to Cover the Front Terrace off the Movie Room
Attached proposal and photos for your review
JEE had concern regarding wind, so the awning was designed with 5 sections to add strength to structure. Each section (5) would project out 18' from the outside wall of the terrace. Someone on LSJ would need to confirm footing install, reconfirm final measurements and it would be advisable to have someone Visit MD facility so they can be taught how to install units.

Let me know how you wish to proceed

Regards

Brice Gordon
