Jeffrey

Banyan can have TCAS 7.1 upgrade accomplished by Jan 13th for \$46,667

Or Jan 6th with additional expedite fee \$9847

Is Jan 13 approved without Expedite fee? \$46,667?

Thx

Larry

TCAS 7.1 Change, with the quote I sent you, if I shipped the box out today, you would get it back [on the 13th of January](#). If you pay the expedite fee of \$9847.00, you can have it back on the 6th. This came from Rob at ACSS.

If you could sign the proposal and the work authorization and also attached is wire instructions for the work as well. If we can get this handled, We can move forward quickly.

Neil

Larry,

It was great meeting with you and Mr. Epstein. I look forward to working with you all in the future for sure. I spoke to my DER company yesterday and they feel that if Rockwell Collins does not want to play ball with us, they can build a happy box to make the engines display on the Proline 21 system. They have people that were DERs with Boeing and Collins and they feel this is a non issue. Just food for thought.

As far as the TCAS 7.1 Change, with the quote I sent you, if I shipped the box out today, you would get it back on the 13th of January. If you pay the expedite fee of \$9847.00, you can have it back on the 6th. This came from Rob at ACSS.

Let me know your thoughts on this.

Thank you again for allowing me to speak to you in regards to the Avionics project yesterday. I am excited about the program, as well as the DERs.

Neil

Hi Neil

Thanks for coming out yesterday and meeting with Mr. Epstein What's the fastest we can do to get TCas upgrade accomplished on the Boeing? What do you recommend
