Jeffrey,

I was on the phone with our fuel supplier and asked him that very question before you sent your e mail. He tells me this is a very delicate issue with the St. Thomas Jets center that is owned by Michael Hancock. Our Fuel supplier who only deals with diesel and premium is trying to set us up so that we can buy directly from his supplier which would save 4 %.

That said the rack price right now is \$ 2.7692 per gallon and estimated cost of .90 cents to a \$ 1.00 to get the fuel from St. Croix.

Also there is a fuel truck in St. Thomas asking price of \$ 15,000 for a 1975 Dodge US Air Force truck which I'm told is in good condition. If we bought a truck in the states and shipped here it would probably cost \$ 15,000 to ship something that size.

Thank you

Emad Hanna

Also, I will wait for more info from Emad on the truck before I send the specs to VIPA. They will tell us the required dimensions of the platform.

Hi Cecil,  
Nicolas Van Heurch from Air Center Helicopter, has a brother-in-law who owns Rodriguez Auto parts and the Gas station on St Thomas, his name is KeeKe, he knows Mr. Maldonado at Esso very well since he purchases car fuel for his gas station in quantity from him,...Keeke spoke to Mr Maldonado today and was receptive to selling us fuel,. Mr. Maldonado is going to contact me Monday or Tuesday, he is checking to see if his fueling contract enables him to sell Jet fuel to General Aviation aircraft,. currently his contract is for Airlines only,. He was very nice and willing to help us out,. I will keep you posted,.  
also,.  
Fuel truck dimensions estimate,:  
40 to 45 feet long, and roughly 7 feet wide, this would be a 5000 gallon tanker truck to hold Jet fuel,. depending on truck manufacture, the size may vary in length. Emad is researching fuel truck options,.  
thanks,  
Larry
