Dear Friends,

I would like to invite you to join me in welcoming my good friend U.S. Congresswoman Diana DeGette to New York City on September 27th.

I first met Diana in Stockholm in 2009, when she was the key note speaker at the Swedish-American Life Science Summit. We had asked Diana to speak at the Summit because of her leadership role in the rights for ethical stem cell research. At our recent SALSS 2012 we had an important panel on the diabetes crisis, a subject that Diana has advocated for many years. I have learnt to respect and admire Diana de Gette as an important stronghold in congress and want to show our support. My friend Christine Rappoport and I hope you can join us, Thursday, September 27th, around 6pm at her home at [REDACTED] to learn more about the work Diana is doing; please see included invitation.

Hope to see you there!

Best,

Barbro
