**Subject:** IMDx Obtains CE-marking for HSV Assay

**Date:** Mon, 30 Jul 2012 21:11:55 +0000

---

I hope this message finds you well and that you are enjoying your summer. I am delighted to inform you that IMDx has obtained CE-marking for a test for Herpes Simplex Virus 1 and 2. HSV is one of the most common causes of STD's, but can also invade other human tissue, occasionally causing keratitis, encephalitis, meningitis, and neonatal sepsis. We are proud to add HSV 1/2 to our expanding infectious disease testing portfolio, which includes tests for hospital-acquired infections including C. difficile and vancomycin-resistant enterococci and prenatal screening of Group B Streptococcus.

My best,

Alice
