new apple tv has been installed by james and is in place running 1080P
al sent his technician Rob to the house today to obtain serial numbers on (projector, HDMI cables and receiver)
that appear to be blocking the 4k from operating
projector should not be an issue as specs show Epson LS 10500 is 4k compliant

al will have feedback tomorrow and a proposal but will not be able to install until early next week as he does not
inventory equipment
