Jeffrey

Patrick proposes that once RO has been serviced this week another sample be taken and sent to lab for analysis

Regarding the Proposed Water Softener

1. The Ranch is replacing proposed fleck units with the below model
Kinteico CP216 Duplex Softener
Control heads on the Fleck model where prone to failure
 2. Someone will need to check with DPNR regarding discharge of Brine, could be a permitting issue
Or install some where they won't see system during site visits
 - 3 Danny will need to install variable speed drives on the main distribution pumps otherwise the continued water hammering that is occurring will dramatically shorten Softener controls
 4. Why hasn't Danny switched Master bedroom and main compound over to cistern water
You had this system and cistern refurbished for back up just incase this type of event happened.
All the cisterns where cleaned out prior to my departure 2013
- Regards
Brice
