Subject: Barge

Date: Sat, 30 Sep 2017 17:39:52 +0000

Greetings all subbase dry dock wants us to temove the barge from their facility, i dont think its apprpriate the barge has a 10 inch gash that according to Grne is not taking water.I dove the barge and saw the gash, they cant see it because water is like cholate milk right now. I beg uso not to make me ride in this craft as iam no longer comfortable in it after thursday near collision with a ship due to loss of steering and power, i got extremelly nervous. I have no problem assisting in the tying of it in red hook but do not ride in it from town with a gash on bottom.

Respectfully
Carlos
