Importance: Normal

Mr. Epstein I will check with other control companies to see if the speed of their scu's are faster than 48mhz .The way i understand this speed , is the speed internal to the SCU cabinet at which information is shared around the control network or processed , 16mhz is the existing controller speed to the new scu controllers speed at 48mhz .Siemens claims they are the industry leader in SCU controllers and new controller processes 5x faster than what is currently running .I will check to see if anyone beats their technology or I will check to see if Scott knows of any faster SCU controllers that are available. Richard

Rich

I have attached 4 proposal for your review

1) System Upgrade

With the interface with the Apple IPAD you have 3 option

1) Costumed application with Creston

2) Siemens Apogee GO

3) Have your IT group us a remote desk top application by others

Service contract

Call me to review

Thanks
