Unique insights

A NEW PHOTO BOOK PORTRAYS THE
BERLINER PHILHARMONIKER DURING THE
RATTLE ERA

Dear jeffrey epstein

Life as a Berliner Philharmoniker is full of memorable moments – during a concert, backstage, and on tour. The photographer Monika Rittershaus has accompanied the orchestra and its chief conductor Sir Simon Rattle over many years and captured many such special moments. Her photos now appear in an extensive, elegantly produced book entitled *moving music*.

The images, taken in Berlin and on tour, are like a retrospective of the Berliner Philharmoniker's Rattle era. Sensitively shot, they show not only inspiring musical high points but also the quiet concentration of the musicians before a performance. These are unique insights into the work of the Berliner Philharmoniker and their encounters with people and places around the world. In short interviews, we also learn first-hand what it means to be a member of this incomparable orchestra.
