---

Jeffrey,

Attached is the bid for two John Deere Pro Gators. Vehicles that would be used to haul heavy materials around the islands. Please look at attached photo of one of our Mules loaded with stone. It destroys the belt drive in the Mules, they are not designed for this kind of load. The Pro Gator is a Diesel vehicle rated for a 6500 Lbs load capacity.

List Price is \$32,108 per unit. Daphne has gotten a Quote for two units @ \$56,257 plus freight (Freight is \$1592 each with Tropical)

Spare parts and service manual are reasonable priced. Parts quote attached as well for you information (It has windshields listed which will not be needed)

Thanks

John
