Jeffrey

attached for your reference

1. Cover letter and final invoice for equipment and infrastructure upgrades
2. Quote for new T1 service upgrade.

Situation:

Thursday 22nd May I reset T1 Data circuit (TW Telco) as it was in alarm.

Monday 26th May (PM) the Data circuit link went down again, unable to reset.

Yesterday afternoon, I was at Sandia Crest, there until 7pm with Century Link and TW Telco checking/testing the Data Circuit.

TW Telco are able to get signal to our smart jack on Sandia Crest, but could not see our equipment on the Data Circuit. With internal testing of our link, it appears the Microwave Radio has taken a hit at some point either from lighting or a power surge.

The Ranch still has satellite service (Space Net) for Internet (Data) and at this time one T1 for Phone. (TW Telco)

My concern is the complete failure of the Phone T1 card.

The existing radios were installed by Valcom, around 08/2005

Richard Boltz (Advanced Communications) helped me with the internal testing. The owner of Advanced Communications is requesting payment of the outstanding invoice for equipment and infrastructure before a service call to test the Ranch's Radios is scheduled

Invoice submitted to NYC for payment 8 April 2014

Outstanding balance is \$22,739.34

How do wish to proceed, pay invoice or wait until Rich has reviewed quote for T1 service upgrade?

Brice

On Monday 26th May (PM) the Data circuit link went down again and I was unable to reset.

Yesterday afternoon, up until 7pm last night I was on Sandia Crest with Century link and TW telco checking/testing the Data Circuit.

TW Telco are able to get signal to our smart jack on Sandia Crest, but can not see our equipment on the Data Circuit. Internal testing of our link, it appears the Microwave Radio has taken a hit at some point either from lightning or a power surge and the Data card will probably need to be replaced

The Ranch still has satellite service for Internet (Data) and at this time one T1 for Phone.

My concern is the possible failure or deterioration of the Phone T1 card.

The existing radios were installed by Valcom, around 08/2005

Richard Boltz helped me with the internal testing, but he can not setup a service call with the outstanding unpaid invoices.

Can you help me out here please

regards
