Subject: Materials at request of David Rubenstein

Boris,
David asked me to send you the two attached documents before our meeting tomorrow. One is a high-level concept piece on the global healthcare venture fund idea that we prepared to help David introduce the concept to folks around Carlyle. It provides an overview of the market opportunity as we see it, though of course with much less detail around investment strategy and emphases than will be included in the eventual fund placement memo and presentation. The other is a confidential summary of an investment opportunity that we are pursuing involving *Xigris*, the sole approved, on-market drug for severe sepsis.

I look forward to seeing you in the morning.

Ryan
