LOT #1 THE ULTIMATE HEALTH EXPERIENCE
DEMYSTIFY PERSONAL GENOMICS /
EDUCATIONAL SESSION FOR TWO

Mount Sinai has moved into national prominence with its innovative approach to genomics and personalized medicine. Now you can take advantage of the new "big data" technology that is transforming the way we think about disease and sit 1-on-1 with Joel T. Dudley, PhD, Director of Bioinformatics, and Elissa Levin, MS, CGC, Head of Genomics and Integrative Health Innovations, to help you and a guest demystify the brave new world of personal genomics. During this extraordinarily rare educational session, Dr. Dudley, who had his own genome sequenced, will discuss his experience and address the following:

- What information is in your personal genome?
- How does your unique biological blueprint impact your risk of developing certain diseases, or affect how you will respond to medications?
- What are the benefits and risks of this information?
- How do physicians use precision medicine to tailor therapies to an individual's unique genetic makeup?

"OBSERVERSHIP" PROGRAM

Your up-and-coming super scientist will spend up to six weeks in a coveted "observership" at the Icahn School of Medicine at Mount Sinai, one of the highest-ranked academic medical centers in the nation.
