Subject: Neurocognitive video courses now available

Date: Wed, 25 Mar 2015 18:09:21 +0000

Dear Jeffrey Epstein,

The Luria Neuroscience Institute is pleased to present **video courses** about the brain and the mind. They are intended primarily for professionals concerned with **mental health and with the brain and brain disorders**.

Each online video course takes **3 hours and 3 CE Credits** will be awarded for each. The video courses are recordings of the live webinars which took place in November - December 2014.

Download the brochure [here](#) (PDF file, 465 Kb).

For more information please visit linstitute.org.

Video Course 1: Executive Functions and the Frontal Lobes

- Executive functions and frontal-lobe functions: are they the same?
- Components of executive functions (planning, impulse control, working memory, and others).
- Novel approaches to understanding the frontal-lobe functions.
- Executive functions, laterality, and sex differences.
- Regulation of emotions: frontal lobes and amygdala.
- Executive functions in development and aging.

Read the full description and **register [here](#)**.

Video Course 2: Executive Dysfunction in Brain Disorders

- Executive dysfunction in neurodevelopmental disorders (ADHD, Tourette's Syndrome).
- Executive dysfunction in dementias (Alzheimer's disease, Lewy body dementia, Fronto-temporal dementia).
- Executive dysfunction in cerebrovascular disorders (CVA, aneurisms).
- Executive dysfunction in traumatic brain injury (reticulo-frontal disconnection syndrome).
- Executive dysfunction in neuropsychiatric disorders (schizophrenia, affective disorders).
- Executive dysfunction in movement disorders (Parkinson's disease, Huntington's disease).

Read the full description and **register [here](#)**.

Video Course 3: Laterality and Functional Organization of the Brain

- Where the traditional notions of hemispheric specialization got it wrong.
- Functional laterality and brain anatomy.
- Novel approaches to hemispheric specialization.
- How the two hemispheres develop and age.
- Laterality and gender and handedness differences.
- Laterality and regulation of emotions.

Read the full description and **register [here](#)**.

Video Course 4: Laterality and Brain Dysfunction

- Laterality and learning disabilities (dyslexias vs NVLD).
- Laterality and dementias: Is fronto-temporal dementia lateralized?
- Laterality and striatal disorders (Parkinson's disease and Tourette's syndrome).
- Major cerebrovascular disorders and cerebral hemispheres.
- Laterality and neuropsychiatric disorders: Schizophrenia and the left hemisphere.
- Laterality and differential functional breakdown threshold.

About the presenter:

 Elkhonon Goldberg, Ph.D., ABPP The video courses feature **Elkhonon Goldberg, Ph.D., ABPP**, a clinical neuropsychologist and cognitive neuroscientist, Clinical Professor in the Department of Neurology, NYU School of Medicine and Diplomate of The American Board of Professional Psychology in Clinical Neuropsychology. Elkhonon Goldberg, Ph.D., ABPP authored numerous research papers on functional cortical organization, hemispheric specialization, frontal lobe functions and dysfunction, memory and amnesias, traumatic brain injury, dementias, and schizophrenia. Goldberg's books *The Executive Brain* (2001), *The Wisdom Paradox* (2005), and *The New Executive Brain* (2009) have been translated into 16 languages. He coauthored *The SharpBrains Guide to Cognitive Fitness* (2013). A sought-after educator, he has lectured worldwide. Elkhonon Goldberg was a student and close associate of the great neuropsychologist Alexander Luria.
