Dear Rich,

We understand your concerns, and due to the fact that we had not experienced such boat behavior before, we are checking with all experienced designers the potential problem. We have undertaken several consultations which will give some suggestion in the coming few days.

Regarding the visit, as I mentioned due to family matters I cannot come personally. I discussed this matter with my father, the chairman of the company, and he is planning to visit you. Maybe with one more person.

We checked the route, the fastest takes 30 hours one way...
Gdansk - Amsterdam - NY (or Atlanta) - St Thomas

Additionally the visitors will probably need a entrance visa to USA - this takes a few weeks.

I ensure you that we are willing to solve this matter asap.

If possible, please send a video of the boat making noise when standing (not cruising).

Best regards
Adam Zygowski

I do not think you are understanding our concerns. We believe that this particular boat is the issue. We have had ten different people including customs agents, all agree that there is something dramatically wrong.

That is why we would like you or someone from your company to see boat immediately.
Please let me know when this can occur as Mr. Epstein said he would pay for your travel expenses.
Thank you.

I am contacting many users of this model, and checking if they had any similar issues with the boat.
I will come back asap.

Best regards
Adam Zykowski

both the island personnel and mr epstein have had many cabin ribs over the years. this is nothing like anything either mr esptein or his experienced crew have ever heard . It is virtually impossible to drive it without head phones on and the pounding is extraordinary. the boat today is useless to both mr esptein and his island. it is not merely the sound but the pounding of the boat as it moves through the seas.

Dear Rich,

Following our phone discussion with Mr. Epstein, I would like to inform that before we send somebody to USVI, we ask you to carry out the following activities:

1. Please send a picture of the boat laying on the water taken from the side - so we see the trim of the boat
2. Please check if the bilge plug (in the lowest point of the transom) is correctly fitted - that there is no water ingress
3. As I understood, the boat is making noise even when it is not cruising?
4. I also understood that you had covered the entrance to the bow compartment in order to check if the sound difference?
5. Please send the model of Yamaha engines mounted on the boat

If the video's sent by you few days ago give the actual sound reception, then this sound is not untypical for a RIB cabin boat.

However in order to soundproof the cabin, we suggest to cover the place where you stand in the bow compartment with a foam block and additionally mount a door at the entrance.

Best regards
Adam Zygowski
