**Subject:** Little St.James Watercheck Extensive Reports x2- 03-14-17

Good Morning Ann,

Thank you for utilizing our services to investigate the quality of your water.

Please find attached your **Extensive Watercheck Reports** for two **Little St. James** sample(s) brought in on 03-14-2017, as per your request.

On **Page-1** of both of your reports, you will find a "**Definition and Legend**" box which provides information on the results of your water test as it compares to EPA National Standards. There are several shapes and colors that help you identify each parameter as it pertains to the detection levels of each test. According to the results of your reports, there are **no parameters that exceed National Standards**, respectively. Any parameter that may have exceeded would've been indicated by a "Red Cross". However, we do ask that you read the report thoroughly so that you may understand both the reporting results and that of the presented EPA guidelines.

Best,

*Oonijah Thomas*
