We had a fabulous meeting with the COE yesterday. We are good to move ahead with permitting both dock alternatives and the temporary barge landing.

That being said we need to now get the docks designed. I would suggest that I get proposal for you from Jeff Bateman, he does a good job and is respected by the COE.

I'll send you a map of my final locations a little later today, my computer is dead so it'll have to wait until I can get to plug it in late today.

As soon as we have plans we should be able to submit for permits within a week.

We also had a great talk with federal fish and wildlife and they want to work with us.

Cables no one sees any issues so it now just push WAPA.
