CONFIDENTIAL:

Hi Jeff,

Please keep confidential this document as I signed an NDA and i am responsible of any misuse information.

You know I adore tech and sciences, I am non stop looking at new internet technologies to find the new Facebook, Snapchat etc. I really believe in this new application for mobiles: [REDACTED] has been invented by Marco Nardone, now i know him well, he is a young, very smart guy (26 year old, half chinese/italian). He created UNII, the social network only for University Students, UNII has just been launched last week in Boston University while already very active in UK. I am not interested by the social Network UNII however i think [REDACTED] is awesome and this is where i want us to invest now! I think FLING will be the next 'big thing' in messaging, and as an app they have something that can be just as dominant as Snapchat (now valued at \$10bn). [REDACTED] made over one million downloads in just 14 weeks...Please read this brief presentation attached and Marco's mail here bellow:

So I attach the [REDACTED] presentation - please don't share this with anyone as these are details that I have not even made public to our own investors yet (in fact this presentation is the Investor Update that I am preparing that will be sent this week). I have excluded the parts on Unii etc as they're not ready yet.

In terms of numbers I have a full [REDACTED] business plan but I'm not really comfortable sending that (with or without NDA) in a digital format because it's literally my entire plan for the next 12/24 months and if it ever got leaked (or if your PC ever got hacked etc) that would spill all the secrets etc of my company onto the internet. I can show you it next time I see you but to be honest most of important stuff is in this document I'm attaching here, there's more in the doc like problems we need to overcome, some pieces of code etc in there (which is why I don't want to ever send digital versions...).

In terms of aims for [REDACTED] in house we want to hit 1m daily active users (DAUs) - we have 1.2m users with 225k DAUs, we want to increase that first to 1m DAUs. The next milestone to hit is 10m users (with perhaps 3m DAUs). These are our targets. At 10m users you begin to talk about a valuation of \$50-100m I reckon perhaps.

Let me know if you need any more info and when you're ready to meet again we'll put something in the diary :)

Hope you're well and all the best!

Marco :)
