Subject: FW: Discussion between Zorro Ranch and Advanced Communications

Date: Tue, 17 Jun 2014 00:34:00 +0000

I will also speak with Advanced about using other equipment that has less lead time. We are scheduled to speak tomorrow am and I believe that they are the correct vendor for the job based on timing. They believe they can achieve FCC licensing in 2 weeks or less.

Richard Boltz was terminated as Advanced has been losing a lot of government work. Lori, the sales manager, said they had plenty of other talented technicians and did not envision rehiring Richard for this job.

Good afternoon Richard,

I have verified with our suppliers and the Ceragon equipment does have a longer lead time, like we talked about today. I am being quoted 8-10 weeks. I will push to get a faster delivery time once we talk tomorrow.

Thank you,
Lori

When: Tuesday, June 17, 2014 6:30 AM-7:00 AM (UTC-07:00) Mountain Time (US & Canada).

Where:

Good afternoon Richard,

Patrick and I will call you tomorrow at 0630EST to discuss the proposal for the Ceragon link between Sandia Crest and Zorro Ranch.

Pat, Richard was curious what the difference is between 6Ghz (our proposal) and 11GHz (another vendor's proposal)

Thank you,
Lori
