Jeffrey,

to order Suzuki engines, it only takes two weeks to receive them from the states, once order is placed, the dealer in St. Thomas receives containers every two weeks, we would have priority for installation once engines are recieved, which is 5 days max to install.

I would like Carlos to continue Nana minor cabin refurbishment at this time, new carpet in cockpit side walls, light touch up of teak deck and compound and wax the exposed fiberglass areas. I would like him to order Carbon Graphite dash panel overlay, GPS Map 3D view for \$1,800.00, so all that would be left is engine installation and cut out holes for new gauges when you give final go.

is this approved?

thank you,

Larry

I have seen several Suzuki 300HP in the water this weekend, very quite and slim engine compared the Yamaha's and Verado's

(my back up plan: keep the Mercury Verado's installed and send a specialist to LSJ, if you do not drive this boat.)
