Good day boss,

I was hoping to reconnect the Flag Pole Pool System when I came over. Unfortunately, the weather proof box at the pipe opening was not installed as yet by Danny. I need this box to make my connections to thinner 10 gauge wire to pass through the 1" pipe to inside of the cabana (as shown in the Picture). I brought it to Anna attention for Danny to install. In addition, I sent her a picture of STC open rack for \$1400. It will not need additional cooling fans and take up less room than the enclosed rack. It is in stock locally and can be setup on Monday if you approve.

Terrence found the leak at 5 Palms and patched it since Anna could not reach Danny. And the fiber guys will be back to recondition the fiber from the gym to 5 palms on Monday.

Regards
JRuan
