Who would win in a fight between Hulk and Batman?

 Sultan Lashari
61.9k views

 I just mentioned this somewhere, this battle has already happened. In a 1981 special, Batman took out the Hulk in an absurdly efficient Batman kind of way. After a mess involving the Joker, the Shaper-of-Worlds, and a fake general, the Hulk began a rampage at Wayne Tech. Batman tossed a knock-out gas grenade at Hulk's head, and then kicked him in the solar plexus, forcing the Hulk to breath in ... [Read More »](#)

If Singapore and Malaysia go to war, which country will emerge victorious?

 Ang Chi Siang
120.6k views

Every male who has done National Service in Singapore knows the answer. We have simulated the scene in trainings. Our war doctrine mimic those of the Israelis and prefers a preemptive strike rather than a reactive defence. Our training ground simulates all kinds of terrain you commonly found in our neighbour. Our terrain is urban built up area which only favours entrenched and hidden forces. If a ... [Read More »](#)

If you received a "They are coming for you in 10 minutes" text message from a random number in the middle of the night, what would you do?

 Sarah Weaver, Living, Thinking, Learning, Helping
137.9k views

The question is: **"If you received a "They are coming for you in 10 minutes" text message from a random number in the middle of the night, what would you do?"** I'd text back: "Confirm Password" Just in

case, I'd wake my eldest daughter (just mustered out from the USMC) and show it to her. We'd arm ourselves (yes, with firearms; what were you expecting? baseball bats and pepper spray?) and watch the ... [Read More »](#)

Who would win in a fight between The Flash and Thor (the Marvel comics character)?

 Caleb Hu, Dumber than I look.
41.1k views

 People are just taking into account that Thor is strong and durable, while Flash is only fast. There are no ways Thor can win. If Thor summons a portal, Flash will avoid it. Lightning, Flash will avoid it. Any other magic, Flash will avoid it. Why? Flash is also fast. Very fast. According to the picture, he's calculated to run at 13 trillion times the *speed of light*. How can Flash win? Let me count... [Read More »](#)

How do people who bullied celebrities at school feel ?

 Nadine Rafiq
73.8k views

I was a friend of two girls (Let's call them **S** and **T**) who were 3 years older than me. S was a gorgeous blonde girl, she was famous for her beauty and stupidity. She was okay with being stupid that she always said "I'd prefer being a stupid peafowl to being an intelligent chimpanzee". In contrast to that, T was quite smart, good at school, not very attractive, obese, introvert and absolutely weak... [Read More »](#)

What do US military veterans think of Donald Trump?

 Ken Forst, Artisty guy, short-order cook, Army medic, copywriter
42k views

I am a Vietnam-era vet, I served in Korea. My experience in that time taught me that the military is not the monolithic conservative Christian voter-block some would prefer to believe. It is simply a reflection of the American public at large; there were lifers and draftees, sane and sincere patriots, there were truly criminal types, straights, gays, atheists, bible-bangers, alcoholics, teetota... What do the British do better than continental Europeans?

 Philip Nunn
66.6k views

 Electrical sockets and plugs. The UK design is not just better than Europe but is easily the best in the world. They only go in one way. They allow for devices to be earthed. They don't fall

out all the time. You can't accidentally stick things into them. They are individually switched. It is extremely hard to pull the wire out of the plug and even if you do manage it the first wire to break lo... [Read More »](#)

What if Superman snapped his fingers as hard as he could?

 Ben Skirvin, Journalist and Philosopher
23.1k views

 Silver Age Superman was capable of moving at imaginary speeds several magnitudes faster than light. In all likelihood, he is capable of snapping his fingers at a similar speed. Which would be disastrous for the planet. As an object approaches the speed of light, its resting mass increases towards infinity. In normal relativistic physics, only photons are capable of reaching such speeds. However, Su... [Read More »](#)

What are the most complex video games?

 Anthony Dowd
26.2k views

 I played this game once, it was a tough little cookie. Now bear in mind while I relate this story that I had been playing games for nearly three decades at this point, I had an expert grasp on gaming lexicon and lore which allowed me to become competent at any game within two hours. So I had this band of creatures to care for, I had to work for their survival and betterment. Immediately upon star... [Read More »](#)

How do I get out of jury duty?

 Franklin Veaux, Small business owner, sexuality educator, writer
144.5k views

I've been summoned for jury duty many times, but I've never had to sit on a jury. It's been the same thing, every single time:

Lawyer: "Number 117, what do you do for a living?"

Me: "Well, I'm a computer programmer, and..."

Lawyer: "Thank you, number 117, you're excused."

This has happened to me, not once, not twice, not three times, but *every single time I have ever been summoned for jury ...* [Read More »](#)
