They took a blood sample to examine my hormonal profile. He did ultrasonography- again w negative results for any disease.

But doctor said being late after that shot is quite okay in my organism, because it probably needs longer time to restart after such a long time. I'm going to see them again next week for my blood results. He recommended to wait another week, having a glass of red wine every evening, being relaxed and I'll be all good, ready to start w pills.
