Subject: St Barts Heli flight

Date: Mon, 09 Sep 2013 18:38:28 +0000

Jeffery, here is the satilight photo

Weather for tomorrow's heli flight to St Bart will be similar to todays weather, low visibility due to low pressure North of St Thomas, If the Low pressure continues to move North weather should improve,. Note the satilight image below, there is a line of weather between St Thomas and Puerto Rico, which builds up in the afternoon, since its pushing down from the North due to the spiral movement of Low pressure.
