Subject: You have 1 new DNA Relatives introduction
Date: Wed, 28 Aug 2013 20:55:34 +0000

Dear sam epstein,

We've got great news! This past week, you've received a new DNA Relatives introduction. If you accept, you can join forces to fill in gaps in your family tree. For example, by comparing family surnames and locations, you might discover where your ancestors' paths crossed.

Please accept or decline your introduction by following the link" below. Your identity won't be revealed unless you accept, and your medical information will never be shared.

Who's Invited You:

Stephen Fineberg, a predicted 3rd Cousin, with likely range 2nd to 3rd Cousin
You likely share a great-great-grandparent.

Fill in your family tree.

23andMe's DNA Relatives identifies undiscovered family members by searching for shared DNA. Members can anonymously contact their relatives to extend their family trees, and learn about shared ancestors.
