---

Attached is Lutron punch list. Owner of Apollo electric confirmed there were no new workers on the week in question. In addition their men wear blue shirts not black shirts. Please advise. Thank you.

Richard and Merwin,

All lighting zones have been finalized and are fully functional. All scheduled keypads have also been finalized and programmed. We have ordered and will install two more switches for the Master Closets to allow those zones to be integrated into the global commands. We have also ordered an additional keypad that will be installed in Merwin's office to provide him with his own set of global commands.

Punchlist:

- Install black engraved keypads [H-M-M/L-L-OFF]
- Consult on engraving nomenclature for global commands on secondary keypads.
- Set up Lutron app on smart devices.
- Consult on scene settings and provide tutorial for owner altered settings.

Note: Spiral staircase has been programmed as originally programmed. The original system has the spiral staircase lights track both the 3<sup>rd</sup> and 4<sup>th</sup> floor hall. While it is possible to add keypads to segment this operation having the staircase tied into these scenes is sensible from the perspective of simplicity and lighting design.

As per our punchlist completion a meeting to consult on engraving and scenes will be at your convenience. Please note that I will be leaving for a convention from Wednesday afternoon until Saturday. I will do what I can to have George and Luigi available should you wish to proceed this week.
