I am doing a talk at JP Morgan from 1 to 2 PM tomorrow
Will head your way after that
Will message when I leave
Is that ok ?

our visual perception is comprised of a radiation detector tuned to a limited band of frequency. this limited band of frequency, humans name " visual light " . It is clear that if our frequency was in the radio wave band. we would not " SEE " walls , radio waves as evident from wifi pass through walls . would the walls exist for us ? if we couldnt percieve them" .- not likely. therefore walls and the names we give them are clearly human constructs. :)

I thought last night could have been more professional as some of the people in addition to you might have had something interesting to say in a better organized event

gromov is coming on sat . at 130 . you are also welcome . you and I are on for friday at 330
