Jeffrey

Pete has Duncan avionics working on the GIV IRU indication issue

They will continue working on the aircraft tomorrow, so far Pete is not impressed with their troubleshooting ideas, i'll remind Pete to have Duncan contact Tech Support and Savannah for their assistance,. this could require Gulfstream in Westfield to address this issue since it's a momentary/intermittent problem

Depending how troubleshooting goes tomorrow, maybe I should think about taking the GIV to Gulfstream Westfield on Wednesday for Troubleshooting in case you are planning to use the GIV for Paris this weekend?

Thx

Larry
