This is the largest Engine they make in the city express. It does have a good amount of power. Remember its really Light.
For what you are using in for I think you will be very happy with the gas saving and power of the Van.
Everything else is very large and bulky.

i am concerned that horsepower of 131 and torque of 139 is to weak
does city express come with a larger engine or is there something that is more powerful that you would
recommend
please advise
thank you
