Dear Britt,

I think we are equally lucky with our children.

Attached is the draft abstract for my daughter's dissertation for a PhD in Physics.

Amazing what your son is doing to save lives.

Jes

Since I know you two like to read so much :) ...

I would really appreciate an extra set of eyes. I know that most of this material will be foreign to you, but I would love some help with catching typos. You are more than welcome to read all of it, but if you don't want to then even just reading a paragraph, section, or chapter would be amazing! I have a hard time catching my own typos especially when this is so long!
