Rich

I asked Bruce to provide a bid to install the new phone system before the install of Fiber/data.
please review

Brice,

Attached is a quote to to install the IP telephone system with 4 regular phone lines provided by the phone company. It does not have the PRI card, for digital lines, nor tying in Ranch Central, which requires cabling, but can be added at a later time. I have added the cable re terminations to the quote which may seem high, but it will take several days to gore terminate, test and label each jack. I still have not found the exact jack that you have installed but have a distributor looking for it. We may need to replace the entire face plate and other jacks if we can't find the correct insert because it is no longer manufactured. If you prefer, we can do the cable re terminations on a time and materials basis and bill for the actual time and materials used.

I haven't found the Iphone docking station for conference calls yet but will continue to look for a device that will work.

Please let me know if I have overlooked any thing.

Bruce

good morning

two quick question, can you install phone system under present data delivery
also do you know of a apple dock for phone conferencing etc

regards
