Here's a response to yrs (right below); substance in attached bullets.

We see it as around 3.5-4 million to do it right in a year. Can we talk or meet?

Working with Sirius: \$3.5-4 million project/ 12 months..... \$500K design, 500K running the project & the company, 1 mill infrastructure, 1.5-2 mill development; result is a launch in 12 mos of in-car heads-up computing. B/c Internet Radio is coming on so strong as a threat to Sirius, strikes us that Sirius could use a dramatic new service to hold its position, & this is it. (Sirius will do it some way or other; why not right, with the Apple advantages of brilliant & simple design?) (Of course assumes 2-way, send-receive, Sirius capability.)

I've now got & would like to send you a couple of Mary McCarthy bks; to yr NY address? Will they get through?

Pls let me know when you can talk. In-car streams are big, & w/i 12 mons someone will else be doing them. But if we have the biz & the patent, they'll buy us or be out of luck. (Or we'll buy them.)
