 [This Week on Kickstarter](#)

AUGUST 16, 2012

This week's projects are making the world a more colorful place: a set of whimsical vinyl tiles for DIY decoration, an experimental synthesizer you can build (and rebuild), and a horror graphic novel that turns the superhero genre on its head.

 [LEAVING MEGALOPOLIS](#)

LEAVING MEGALOPOLIS

by Gail Simone/Jim Calafiore

 [Category](#) Comics

 [Location](#) Somerset, NJ

Get outta town

Leaving Megalopolis is a no-holds-barred horror graphic novel that follows a group of survivors attempting to flee their home city after its band of superhero protectors suddenly turn into homicidal maniacs. Sprung from the veteran creative team of Gail Simone (*Wonder Women*, *Justice League*) and Jim Calafiore (*Aquaman*), this ultra-dark tale is equal parts monsters, mayhem, and uproarious fun.

Molecule Synth: An Electronic Musical Instrument for Everyone

Molecule Synth: An Electronic Musical Instrument for Everyone

by Travis Feldman

 Category Open Hardware

 Location Portland, OR

Science of sound

The Molecule Synth offers all the basic components of a traditional keyboard synthesizer — a speaker, an amp, a sound generator, and a pitch controller — but presents those elements as separate pieces that you can arrange (and rearrange!) in various combinations to build your own musical device. Each part is color-coded and interchangeable, allowing for the creation of endless tones and patterns. Who knew the future could sound so bright?

HEX6AGON: Transparent Tiling Vinyl

HEX6AGON: Transparent Tiling Vinyl

by Sara Czosnyka

 Category Product Design

 Location Los Angeles, CA

Show your true colors

Make your world a more whimsical place with Hex6agon, an interactive, customizable set of transparent vinyl tiles you can adhere to any surface to create colorful, geometric shapes. Available in a variety of sizes and colors (like Tele-Magenta or Ice Blue), they're perfect for adding a touch of DIY modern design to, well, anywhere you want it.
