Jet pilot [REDACTED],

During our flight to St. Thomas this morning, JE informed me that he is going to let you fly left seat in his GIIB with another female pilot that is typed in the Gulfstream. I'm not sure who he is talking about. I thought I would tell you I don't feel comfortable with you doing this, for you own safety and well being, I felt obligated to contact the Orlando FAA FSDO office (Flight Standard District Office), and advised them of this flight, I told them in the interest of public safety and your own safety, I don't approve of this flight. I hope you agree with me on this matter. The FAA told me they will monitor your flight activity for the next 12 months, and if such a flight acures they will revoke your commercial license. You know I only did this to protect you from injury and damage to JE's plane.

I hope you understand,

Take care,

LV
