Hi Jeffery -- Fair enough; we could accept that if you'd make it 65-35 above 20M and 80-20 above 50M, and if we could close this right away.

Regards,
Dan

better but too complex, for ex, 400k. first everyone gets their money back, and the split is .50 .50 until 20 million .60 .40 up until 40 .70 .30 above 50. the larger amounts in your favor of course

Dear Jeffrey - Regarding our conversation yesterday, we'd propose the following for a \$1M investment:

Any sale at or above \$50M, the investor gets 20%

Any sale between \$30M and \$50M, the investor gets 22%

Any sale at or below \$30M, and the investor's share as a percentage is calculated as $.09X^2 - 4.6X + 80$, where X is the sale price in millions.

This will guarantee a return on the investment for sales as low as \$1.5M (which would produce a 10% return). A \$4M sale would return the investor \$2.5M, a \$10M sale would return \$4.3M, etc.

Would welcome your thoughts and your investment.

Regards,
Dan
